

## Dealerships & Workshops

We have worked on numerous dealership schemes including extensions, rebranding refurbishments and fitouts. We understand the requirements of manufacturers and their corporate images and also the co-ordination required with workshop equipment suppliers. Two recent schemes are shown here.

### Hodgson Dealership, Derwenthaugh, Gateshead

The project includes the construction of the 2 storey building with a first floor showroom and ground floor workshop. Also included is an 8 level car tower which will display 30 cars. This has a central lift which also provides vehicle access to the showroom area. The tower is believed to be the first in the UK and will open in August 2010.

### Revolution Performance Motor Store, Gateshead

A purpose built showroom and workshop catering for the specialist conversion market. Also includes a large external area for shows. Foul water is treated on site and discharged to a local watercourse with the surface water via a purpose built outfall.
